

The second meeting of 2018/19 season will be on Monday 1st October, it starts at 8pm sharp in our usual venue of Ballyclare High School Lecture Theatre. [Directions can be found here.](#)

For our October meeting, we are really pleased to welcome a new speaker to the society, **Professor Mihalis Mathioudakis** from **Queens University Belfast**, who will be giving us a talk titled '**The Sun - Our Star**'.

Although new to us at the society, Prof. Mihalis has lived and worked in N.Ireland for many a year now. As the title of the talk gives it away, he will be telling us about his work researching the Sun. QUB is now one of the leaders in the astronomical world when it comes to research studies on the Sun and Mihalis has been involved in most of them. This promises to be an excellent lecture so I'm sure we will have a good turnout to this talk!

About Professor Mihalis Mathioudakis: Please follow this [link](#) to his page on the QUB website, you will see a lot of familiar names of speakers to the NIAAS over the years!

Please note: Under 16's are very welcome but due to our child protection policy, we ask that they are accompanied by an adult.

As always we will have refreshments available after the meeting, a donation bucket is available at the door if you wish to support us in our work!

Hope to see you all there!
